# 2017 Community Health Improvement Plan

### Letter from the Director

We are excited to present the 2017 North Central Idaho Community Health Improvement Plan (CHIP) to the citizens of North Central Idaho. This plan is a culmination of two years of hard work from many organizations and partners, and we extend sincere appreciation to all who have contributed to the production of this plan. The CHIP addresses the goals, objectives and strategies for improving the overall health status in North Central Idaho.

This CHIP was developed in collaboration with community partners and is based on the results of the Community Health Needs Assessment. It addresses the methodology in which to achieve improvement of health within our communities.

Partnerships are critical for the success of this plan. It is these partnerships that create opportunities for health improvements by creating policies and environments that make healthy choices the easiest choice for families, institutions and communities.

This plan builds on the strengths of our counties' vibrant communities and strives to creatively and collaboratively tackle mental health/suicide, overweight/obesity/diabetes, education and income. The ultimate goal of this plan is to improve the health of our citizens. We hope this plan provides the necessary tools and guidance that will help us impact that goal! To learn more, follow us on-line at: www.idahopublichealth.com

# **Executive Summary**

The 2016 Community Health Needs Assessment: (CHNA) focused on Health, Education and Income and was accomplished through a collaborative effort spearheaded by the Twin County United Way, St. Joseph Regional Medical Center and Public Health – Idaho North Central District. The Community Health Assessment was conducted in a five-county area of North Central Idaho encompassing Clearwater, Idaho, Latah, Lewis, and Nez Perce counties and one bordering eastern Washington County; Asotin. Nearly 2,000 respondents provided input via a survey and hundreds of individuals provided input through community conversations and board meetings. A very special thank you is owed to all the volunteers, survey respondents and individuals who contributed to this project.

The CHNA is intended to identify the health, education and income needs and issues of the region and to provide useful information to public health, hospitals, health care providers, policy makers, collaborative groups, social service agencies, community groups and organizations, churches, businesses and consumers who are interested in improving the health and overall status of the community and region. Joining forces helps ensure that good use is being made of our community's charitable resources by identifying the most urgent needs of the underserved. In turn, this maximizes effort by reducing costs and coordinating research findings into a comprehensive document for use by others.

The results of this collaborative assessment reveals several opportunities for improvement in a variety of areas enabling organizations to more strategically establish priorities, develop interventions and commit resources. The selected areas will provide many opportunities for community groups, working together, to make the biggest impact on the community's health, education & income. The following pages provide some of the information necessary to make informed decisions and set priorities.

The evaluation, which consisted of a <u>Community Health Needs Assessments</u> (CHNA)<sup>1</sup> in each of the counties in North Central Idaho, culminated in the development of this Community Health Improvement Plan (CHIP).

The CHIP was directly influenced by the CHNA. The CHNA process engaged community members and partners to analyze health-related data and information from a variety of data sources. The findings of the CHNA informed community decision-making, the prioritization of health problems, and the development and implementation of this CHIP. The results of the CHNA can be found on-line at: <a href="https://www.idahopublichealth.com">www.idahopublichealth.com</a>

# Community Health Improvement Process

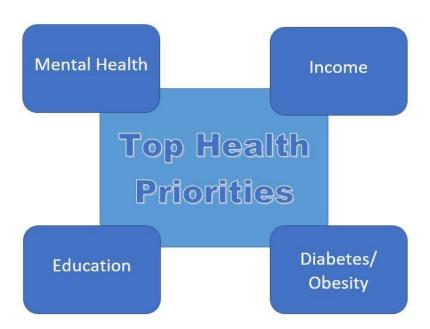

This Community Health Improvement Plan (CHIP) is action-oriented and outlines the community health priorities (based on the Community Health Needs Assessment and community input). The CHIP was largely informed by the results of the Community Health Assessment (CHNA) with community and partner engagement. The identified health priorities will be the focus of action planning to improve the health of North Central Idaho residents for the next 3 years.

Goals and objectives relating to the top four health priorities: Mental health/suicide, overweight/obesity/diabetes, education and income, as well as indicators and baseline data comprise the CHIP. Subsequent community-wide assessments will measure progress made by community partners and will demonstrate change and progress made in the identified indicators.

No single organization has the necessary depth of resources to improve community health. The CHIP demonstrates the collective impact possible when community partners' efforts align with the health needs of the community.

In order to achieve the individual objectives, and ultimately reach the desired outcomes, this CHIP will be treated as a living document, nurtured in a manner that will lead to maximum success. While the individual objectives will continually be revisited, the four priority areas will be re-evaluated in the context of new assessment data, which will occur approximately every three years.

It is critical to note that while this CHIP provides specific focus on four priority areas, it in no way should serve as a constraint to continuing newly initiated and/or unrelated health endeavors. Our regions recognize the value of a broad-based approach to a healthy community and understand the importance of a wide range of activities and endeavors that support a healthy population. As such, any program, resource, or endeavor that contributes to improved positive health outcomes in our region is welcomed and encouraged.

# **Priority Issues**

The goal of the priority issues identified is to increase health education, develop a healthy workforce and create health policies. This action plan is divided into three main objectives in order to meet these goals:

### The First Steps

The first step in developing the Community Health Improvement Plan (CHIP) was to examine the results of the Community Health Needs Assessment (CHNA) for common themes and discuss what the assessment revealed about the health of our communities. Through discussions with partners, several strategic issues emerged.

### Issues Identified

The initial list of strategic issues identified in the CHNA included 9 issues that encompassed a wide variety of health areas. These issues included:

ASSESSED NEEDS	HEALTH	EDUCATION	INCOME
NEED	Overweight/ Obesity & Chronic Diseases (Diabetes, Heart Disease, Obesity)	Post High School/ College Opportunities	Affordable Housing
2 <sup>ND</sup> HIGHEST	Health Insurance	Tutoring for At-Risk	Food Assistance
3 <sup>RD</sup> HIGHEST	Mental Health	Before & After School Options	Managing Finances/ Employment Assistance

### **Priority Issues**

In an effort to keep the CHNA realistic and measurable, the Partners chose to narrow the list of 9 health issues down to the four issues as reported by the public and substantiated by the data. These issues included:

- 1. Diabetes/Obesity
- 2. Mental Health/Suicide
- 3. Education
- 4. Income

These nine health issues were debated by a wide range of community partners and public health in North Central Idaho.

# **2016 County Health Rankings**

### Public Health - Idaho North Central District

With a population of 107,383 (US Census 2015), Public Health – Idaho North Central District is located in rural North Idaho encompassing five counties: Clearwater, Idaho, Latah, Lewis and Nez Perce. In the 2016 County Health Rankings report, released by the University of Wisconsin Population Health Institute and the Robert Wood Johnson Foundation, Public Health – Idaho North Central District's counties rankings ranged from a high of 7 (Latah) to a low of 26 (Nez Perce) out of 42 in health outcomes.

The state of each of the Districts' health is attributed to many factors. Health outcomes in the County Health Rankings represent how healthy a county is. Two types of health outcomes are measured:

- 1. How long people live (length of life), and
- 2. How healthy people feel while alive (quality of life).

The recent county health rankings demonstrate that our region has challenges with adult obesity, excessive injury deaths, and ratio of population to mental health providers. The environments where we live, learn, work and play affect our access to healthy food and opportunities for physical activity which, along with genetic factors and personal choices, shape our health and our risk of being overweight and obese. Being obese increases the chances of developing serious health problems, such as diabetes.

Our deaths due to injury are considerably higher than the state rate and almost double the national average in some of our counties. In addition, we continue to struggle with the lack of sufficient mental health providers to meet patient needs.

The measures of a community's health that have been analyzed in the county health rankings are available for inspection on the Rankings in Appendix E or on the website: <a href="https://www.countyhealthrankings.org">www.countyhealthrankings.org</a>

# **Healthy People 2020**

On a national level, Healthy People 2020 (HP2020) sets a standard for all communities. It is a ruler against which health standards and indicators are often measured. National recognition of the consistent standards allows progress on health improvement efforts to be shown on a comparable scale.

HP2020 served as a guide for developing the objectives and indicators that this CHIP used to unite all community partners. Indicators selected reflect the majority of work being done by community partners. Community partners are working toward the same goals, but each program may have a different way of evaluating program activities. HP2020 provides broad indicators that will have the greatest impact on health outcomes. <sup>2</sup>

The North Idaho CHIP utilized the HP2020 strategy of setting a goal to achieve a 10% improvement rate in each indicator by the year 2020. The next CHIP will be released in 2019. A short-term goal of a 5% improvement rate has been established for this time period. Wherever possible, CHNA data was used to provide the most relevant baseline data for the objectives selected. If CHNA data was not available for a selected indicator, relevant data available was utilized as a baseline.

<sup>&</sup>lt;sup>2</sup>U.S. Department of Health and Human Services. Healthy People 2020. http://www.healthypeople.gov/2020 May2013

# **Implementation Plan**

### PRIORITY AREA 1: Mental Health Awareness and Suicide Prevention

THE PROBLEM: From Healthy People 2020, www.healthypeople.gov

Mental health services and drug/alcohol prevention, education and treatment were both ranked in the top half of health concerns of all respondents. Mental health was the third highest rank of health concerns. 16 percent of respondents, or more than one in six people, reported a need for mental health services over the last year and nearly that many who needed care did not receive it. While only three percent of respondents indicated a need for drug/alcohol prevention, education & treatment, 33% of those who needed that care did not receive it. Mental health also has an impact on income concerns and is the 2<sup>nd</sup> highest need within the income category, specifically getting help for mental illness.

Mental disorders are among the most common cause of disability. The resulting disease burden of mental illness is among the highest of all diseases. According to the National Institute of Mental Health (NIMH), in any given year, an estimated 13 million American adults (approximately 1 in 17) have a seriously debilitating mental illness.

Mental health disorders are the leading cause of disability in the United States and Canada, accounting for 25 percent of all years of life lost to disability and premature mortality. Moreover, suicide is the 10th leading cause of death in the United States, accounting for the deaths of approximately 42,733 Americans (CDC 2014), and 320 Idahoans each year.

### Groups at Highest Risk in Idaho

The rate of suicide completion in Idaho is: 19.6 per 100,000 persons (2014)

- The highest age adjusted suicide rate occurred among Non-Hispanic American Indian and Alaska Natives 20.8 deaths per 100,000 (2010-2014)
- Between 2011 and 2015, 78% of suicides were by men.
- For males, age 15-24 the rate is 29.3 (2009-2013)
- The rate of males (30.3 deaths/100,00) was significantly higher than the rate for females (8.3 deaths/100,000)

Idaho Vital Stats

# Idaho Suicide Facts and Statistics

- Suicide is the 2nd leading cause of death for Idahoans age 15-34 and for males age 10-14. (The leading cause of death is accidents.)\*
- Idaho is consistently among the states with the highest suicide rates. In 2015 Idaho had the 5th highest suicide rate, 57% higher than the national average.\*
- In 2015, 362 people completed suicide in Idaho; one suicide death every day.\*
- In 2015, 60% of Idaho suicides involved a firearm.\*
- 19.8% (1 in 5) of Idaho youth attending regular public and charter high schools reported seriously considering suicide in 2015. 9.8% (1 in 10) reported making at least one attempt.\*
- Between 2011 and 2015, 102
   Idaho school children (age 18 and under) died by suicide. Twenty-four of these were age 14 and under.\*
- Number of emergency department visits for self-inflicted injury per year: 836,000 in the United States.\*
- In 2015, there were 44,193 deaths by suicide in the United States, an average of 1 person every 12 minutes.\*
- The age group with the highest number of deaths for both males and females in Idaho was age 45-54. (Idaho Vital Statistics Suicide Report)

\*www.spanidaho.org

Mental health and physical health are closely connected. Mental health plays a major role in a person's ability to maintain good physical health. Mental illnesses, such as depression and anxiety, affect a person's ability to participate in health—promoting behaviors. In turn, problems with physical health, such as chronic diseases, can have a serious impact on mental health and decrease a person's ability to participate in treatment and recovery.

### GOALS

Improve the mental health and emotional well-being of North Idaho residents by increasing the quality, availability and effectiveness of community-based mental health programs.

- To Reduce the Suicide Rate in North Idaho (MHMD-1)
- To Improve the mental health status of North Central Idaho citizens (BRFSS)
- To Improve Mental Health access in North Central Idaho

### **MEASURES**

Performance Measures for Improving Mental Health

- P1. By 2019, decrease the number of poor Mental Health days reported by adults in our region from 3.6 out of 30 days to 3.4 out of 30 days.
- P2. By 2019 decrease the age adjusted suicide rate in our Region from 30.8 to 29.33.

### STRATEGIES

Strategies for Improving Mental Health

- S1. Improve the mental health status of citizens in the Region
  - Provide MH Training for community education and awareness
  - Recruit new providers
  - Expand access for children with MH issues
  - Develop regional decentralized crisis center in the Region
  - Develop a Crisis Intervention Team

# S2. Reduce the suicide rate in the Region

- Engage with the new Suicide Program at the State Health & Welfare
- Participate in Rural MH Symposium
- Participate in Mental Health Month and resource fair

# **Implementation Plan**

### **PRIORITY AREA 2: Obesity and Diabetes**

According to the Centers for Disease Control and Prevention (CDC), "Obesity-related conditions include heart disease, stroke, type 2 diabetes and certain types of cancer, are some of the leading causes of preventable death". Medical costs associated with obesity were estimated at \$147 billion in 2008. In addition, obesity and diabetes affect some groups of people more than others, particularly African-American and Hispanic populations.

To combat overweight/obesity and diabetes rates, Healthy People 2020 recommends a combination of individual behaviors, as well as policies and environments that support these behaviors in schools, worksites, health care organizations and communities overall.

Weight management, weight loss, and the increase in overweight and obesity are primary health concerns for adults, children, and youth in the United States.

There are many reasons that contribute to the increase in overweight and obesity which make it a difficult subject to address. Behavior, environment, genetics, and access to health care are all factors that play a role in one's weight and general health outcomes. The ability to make healthy choices and lead a healthy lifestyle greatly decreases a person's risk of developing chronic disease.

The number 1 ranked health concern among all respondents, those without health insurance and those with income less than \$50,000 is Overweight/ Obesity. Closely tied to obesity is chronic diseases, which is the 3rd highest health need among respondents with income less than \$50,000 and those without health insurance.

The rate of obesity raises concern because of its implications for the health of Americans. Obesity increases the risk of many diseases and health conditions including:

- Coronary Heart Disease
- Type-2 Diabetes
- Cancers (endometrial, breast, and colon) Hypertension (high blood pressure)
- Osteoarthritis

- Sleep Apnea and Respiratory
- Liver and Gallbladder Disease
- Gynecological Problems
- Dyslipidemia (high total cholesterol or high levels of triglycerides)
- Stroke

Diabetes is the seventh leading cause of death in Idaho and about one third of Idaho adults living with diabetes do not know they have the disease. Effectively managing diabetes will help Idahoans living with the disease lead more productive and healthier lives. An estimated 100,000 Idaho adults, or 8.4% of the adult population, live with diabetes and an estimated 84,000 Idaho adults, or 7.5% of the adult population, live with pre-diabetes.

### Facts and Statistics

- Based on results of the 2015 Idaho YRBS, According to self-reported height and weight measurements, 15% of Idaho high school students are overweight and 11% are considered obese (based on BMI\*).
- The prevalence of obesity was 36.5% among US adults during 2011-2014 (CDC).
- In Idaho, 28.6% of adults are obese (BMI ≥ 30) while 65.2% of adults are either overweight (BMI ≥ 25) or obese (2015 Idaho BRFSS).
- In 2015, 39.4% of adults ate less than 1 fruit/day and 18.6% ate less than 1 vegetable/day (Idaho BRFSS).
- More than 1/3 of adults and 17% of youth in the United States were obese (2011-2014 CDC).
- Percent of Children on WIC between the ages of 2 to 5years old had a 11.9% obesity rate in 2015. (Department of Health and Welfare: Get Healthy Idaho)
- 10 to 17 year olds obesity rate in Idaho was 10.6% in 2011. (stateofobesity.org)

### Idaho BRFSS Data (2015)

- 8.1% of Idaho adults have been diagnosed with diabetes in 2015.
- 28.6% of adults in Idaho were obese in 2015.
- 65.2% of adults in Idaho were overweight in 2015.

### GOALS

- 1. Improve the overall health status of our region by reducing the incidents of diabetes and obesity
- 2. Reduce the percent of North Idaho adults who have been told they have diabetes.
  - To establish a grant committee to track past present and future funding sources for diabetes prevention.
- 3. Reduce the percent of adults who are obese.
  - To establish worksite wellness programs and policies that address overweight/obesity and diabetes.
  - To establish child care center programs that focus on healthy eating and increased physical activity.

### MEASURES

Performance Measures for Improving Mental Health

P1. By 2019, reduce the percent of Adults diagnosed with diabetes from 8.2% to 7.8%

P.2 By 2019, reduce the rate of adults who have self-reported being obese from 24.7 to 23.4

### STRATEGIES

Strategies for Improving Mental Health

- S1. Reduce the % of adults who have been told they have diabetes
  - Support Regional Diabetes Coalition
  - Support Youth Diabetes Programs
  - Pre-Diabetes Community Education
  - Support people with Diabetes

### S2. Reduce the % of Adults who are obese

- Engage the Community in Obesity Awareness
- Promote Adult physical activity
- Worksite Wellness promotion

# **Implementation Plan**

### **PRIORITY AREA 3: Education**

THE PROBLEM: From Healthy People 2020, www.healthypeople.gov

The top ranking education concerns, among all respondent groups, is opportunities for college education or post high school training. A projected 60 percent of new jobs in the next decade will require job seekers to have some college, training or certification beyond high school. Another 27 percent are projected to require a Bachelor's degree or higher. Idaho is in the bottom 10 states in the nation when it comes to people continuing education after high school and completing a four-year college degree. Additionally, Idaho is 46th (of 50 states) of high school graduates continuing on to college directly from high school, 47th in the nation in the percentage of 18-24 year olds enrolled in college, 46th in retention rates for first time college freshman returning for their second year, and 44th in graduation rates from college (BA degree in 6 years).

Compared to Idaho and Washington State averages, the service area is significantly under-educated beyond high school. Except for Latah county, wherein the University of Idaho is located, every other county has more than 42% of the population with a high school diploma as the highest education level and for some areas, more than 50% of the population at most has a high school diploma.

### Groups at Highest Risk in Idaho

- Female students are much likely than male students to go on to college (Office of the State Board of Education, OSBE)
- In 2014, 73% of female high school graduates attended a 2 or 4 year college the fall after high school graduation compared to 64% of male high school araduates.

### Facts and Statistics

- Idaho 79.5% graduation rate ranked 39 nationally according to US Department of Education (2015-2016).
- Only 32% of 3 and 4 year olds enrolled in preschool in 2013. Idaho ranked 50. With less than 38% of students in fullday Kindergarten, Idaho again ranked 50 (Education Week Research Center).
- The go-on rate from High School to College in 2015 was 46% (Idaho High School Feedback Report, March 2016).

EDUCATION LEVEL	Clearwater	Idaho	Latah	Lewis	Nez Perce	ID State	Asotin	WA State
% with NO High School Diploma	15	11	5	12	10	11	10	10
% High School Only	37	41	21	35	32	28	34	24
SUBTOTAL: At most High School Diploma	52%	52%	26%	47%	42%	39%	44%	34%
% Some College	24	26	23	28	28	27	28	25
% Associate Degree	8	7	7	9	9	9	10	10
% Bachelor's Degree	11	11	26	15	15	17	11	20
% Graduate/ Professional Degree	5	4	48	7	7	8	6	12

### GOALS

1. Improve Education and training in our Region by focusing on community resources that promote school readiness and "on-time" High School Graduation, college and career training.

### MEASURES

Performance Measures for Improving Mental Health

- **P1.** By 2019, improve the "go on" rate from 59% to 61.95%
- **P2.** By 2019 increase the number of children engaged in some pre-kindergarten readiness.

### STRATEGIES

Strategies for Improving Mental Health

- S1. Increase awareness and Motivation of College and Career Opportunities
  - Support students to "go on"
  - Increase employer support of education
  - Support Senior Education Survey
- S2. Increase Kindergarten Readiness
  - Develop education pipeline for kindergarten readiness
  - Promote afterschool activities

# **Implementation Plan**

### **PRIORITY AREA 4: Income**

THE PROBLEM: From Healthy People 2020, www.healthypeople.gov

The number 1 ranking income concern was housing for all respondents and for those with income under \$50,000. Additionally, a Needs Assessment completed by Community Action Partnership (CAP) in 2015 also states affordable housing as "one of the top needs identified by program participants and focus group respondents".

The CAP survey reported that on average, over 60% of survey respondents reported they are unable to find affordable housing to purchase, while 67% reported they are unable to find affordable housing to rent. Survey responses indicated that Asotin County is the most difficult county in which to find affordable housing. A benchmark for affordable housing is 30% of income. Families who pay more than 30% of their income for housing are considered "cost burdened" and may have difficulty affording necessities such as food, clothing, transportation and medical bills. A family with one full-time worker earning the minimum wage cannot afford the local fair-market rent for a 2-bedroom apartment anywhere in the U.S. (U.S. Department of Housing and Urban Development). The 2015 Corporation for Enterprise Development (CFED) Scorecard for Idaho reports that 47.7% of renters are "housing cost burdened".

ALICE, an acronym for Asset Limited, Income Constrained, Employed, are households that earn more than the U.S. poverty level, but less than the basic cost of living for the county. The average annual Household Survival Budget for a family of four ranges from \$46,176 in Idaho to \$52,152 in Washington, double the U.S. poverty rate of \$23,550. The number of poverty and ALICE households combined equals the total population struggling to afford basic needs. In Idaho and Washington one in three households face financial hardships as ALICE households. Part of the reason these numbers are so high is that jobs are not located near housing that is affordable and the cost of housing has gone up 11-17% between 2007-2013.

### Facts and Statistics

- The average annual Household Survival Budget for a Pacific Northwest Family of four ranges from \$46,176 in Idaho to \$52,152 in WA double the US family poverty rate of \$23,550. (A.L.I.C.E.)
- Homelessness affects over 4,000
   Idahoans every year, 30% of
   whom are children. (Homeless
   Management Information
   Systems HMIS).
- It's 5x more likely for homeless teens to drop out of high school compared to teens from stable households. (Homeless Management Information Systems HMIS).

A.L.I.C.E. Factors	Clear-	Idaho	Latah	Lewis	Nez	ID	Asotin	WA
BY COUNTY*	water				Perce	State		State
% of Population at Poverty and ALICE	40%	40%	43%	48%	33%	37%	37%	32%
% of Monthly Expenses for Housing	35%	33%	35%	35%	31%	34%	31%	37%
(1 Adult)	\$501	\$475	\$513	\$506	\$402	\$470	\$402	\$528
% of Monthly Expenses for Housing	17%	17%	17%	16%	17%	17%	15%	19%
(2 Adults, 2 Children)	\$626	\$626	\$661	\$626	\$657	\$656	\$657	\$805

A concern among respondents with incomes less than \$50,000, those households considered living at the ALICE level and for all respondents was Support to Better Manage Finances. Closely tied to managing finances is employment, which is noted as the fourth highest need among respondents with income less than \$50,000.

When households cannot make ends meets, they are forced to make difficult choices such as forgoing health care, accredited child care, healthy foods or car insurance. Effective financial management reduces mental stress, crises, risk taking, utilization of costly alternative financial systems to bridge gaps, hunger, homelessness and illness. Within the community as a whole, effective financial management creates a more stable workforce and reduces costs for homeless shelters, foster care homes and emergency health care.

### GOALS:

1. Increase Access to Safe and Affordable Housing in our region

### MEASURES

Performance Measures for Improving Mental Health

P1. Increase the number of affordable housing units

P2. Increase housing resource assistance

### STRATEGIES

Increase access to Safe and Affordable Housing in our region

S1. Increase Access to Section 8 Housing

- Promote need for homeless shelter
- Identify incentive for investors

# **Evaluation Plan and Next Steps**

### **Evaluation Plan**

North Central Idaho Partners will continue to measure the health status of our communities through ongoing review and community assessments. An evaluation of the implementation of this plan will be completed based on the objectives specified in the Plan. Regular updates regarding the implementation of the plan and the achievement of strategies will be provided to the Community by the key partners in the plan. An updated CHIP will be published every three years.

Every September, the Health Districts will publish annual progress reports of performance measures and improvements made in identified indicators with the input of the Partners.

The annual reports will be used in conjunction with community assessments to update the CHIP. The updated CHIP can then be implemented, evaluated and revised thus creating a cycle of continuous improvement.

### **Next Steps**

The Partners and each community will continue to work together to make a difference in the health status of North Idaho. The challenge of moving the needle on our health status is great, but together we are dedicated to a healthier community.

# **Appendix D:**

### Suicide in Idaho Fact Sheet

### Suicide in Idaho: Fact Sheet January 2017

- Suicide is the 2<sup>nd</sup> leading cause of death for Idahoans age 15-34 and for males age 10-14.
   (The leading cause of death is accidents.)
- Idaho is consistently among the states with the highest suicide rates. In 2015, Idaho had the 5th highest suicide rate, 59% higher than the national average.
- . In 2015, 362 people completed suicide in Idaho; about one suicide death every day.
- Between 2011 and 2015, 78% of Idaho suicides were by men.
- In 2015, 60% of Idaho suicides involved a firearm.
- 19.8% (1 in 5) of Idaho youth attending regular public and charter high schools reported seriously considering suicide in 2015. 9.8% (1 in 10) reported making at least one attempt.
- Between 2011 and 2015, 102 Idaho school children (age 18 and under) died by suicide. Twenty-four of these
  were age 14 and under.
- Number of emergency department visits for self-inflicted injury per year: 836,000 in the United States
- In 2015, there were 44,193 deaths by suicide in the United States, an average of 1 person every 11.9 minutes.

# **Appendix F: Community Profiles**

# **Clearwater County**

### COUNTY PROFILE

Clearwater County is located in the magnificent North
Central region of Idaho. From steep river canyons to high
mountain vistas, it has a wide variety of terrain and
outdoor activities for both residents and visitors.

The county is home to the North Fork of the Clearwater River and a small portion of the South Fork as well as the main Clearwater. Also in the county is the Dworshak Reservoir, which is 54 miles long with 19,000 surface acres of water. Boating and fishing spots are popular with visitors and residents. Additionally, Dworshak State Park, Dworshak National Fish Hatchery and the Dworshak Dam, which is the third highest dam in the U.S. and the tallest straight axis concrete dam in North America.

The scenery is breathtaking, with numerous hills, mountains, forests, valleys and rivers to delight any photographer. There are plenty of historic sites to experience, including the site where the starving Lewis and Clark met the Nez Perce Indians on the Camas Prairie after crossing the Bitterroot Mountains. In addition, the oldest town in Idaho, Pierce, which is a gold rush town and home to the oldest courthouse in the state.

For the outdoor enthusiasts, the area offers big game hunting, fishing, hiking, ATV trails, downhill and cross-country skiing, snowmobiling and camping. The modest Bald Mountain ski area is located between Orofino and Pierce.

### DEMOGRAPHICS

Based on the 2010 census, the population of Clearwater County is 8,761. According to the census, 10.3% of the population of Clearwater County lives below poverty level.

"54 miles of outdoor possibilities!"

### ASSETS

Clearwater County has many strengths and assets, which promote healthy lifestyles. Outdoor recreation is easily accessible throughout the county. Numerous trails provide seasonal recreational opportunities to residents.

# Idaho County, ID

### COUNTY PROFILE

One of the country's largest counties is Idaho County. It is bigger than the state of New Jersey yet boasts one of the smallest population stretches from Oregon to Montana with more than four million trees growing from border to border.

There are 4,431,720 acres of National Forest land within the county; more than any county outside of Alaska. National Forests within the county are: Nez Perce National Forest, Clearwater National Forest, Payette National Forest, Bitterroot National Forest, Salmon National Forest, and Wallowa National Forest. The Nez Perce National Forest is located entirely within the county's borders and is the largest National Forest lying within a single county.

Idaho County is one of the few counties in the United States with two time zones, divided by the Salmon River. Most of the county is in the Pacific Time zone, but those areas south of the Salmon River, including Riggins, but not the towns of Burgdorf and Warren, are in the Mountain Time zone.

### DEMOGRAPHICS

Based on the 2010 census, the population of Idaho County is 16,267. With 8,477.35 square miles, Idaho County only has 1.9 persons per square mile. According to the census, 17.1% of the population of Idaho County lives below poverty level.

"Come for the scenery and stay for the lifestyle."

#### ASSETS

Idaho County has many strengths and assets, which promote healthy lifestyles. Outdoor recreation is available throughout the county. Numerous trails and waterways provide healthy recreation to residents throughout the winter and summer months.

# Latah County

### COUNTY PROFILE

Latah County is located in the northern Idaho panhandle; to the immediate west lies Whitman County, Washington. These counties are referred to as "the Palouse," which produces a large share of the wheat, lentils, peas, oats and barley in the United States.

Latah County is mostly rural with striking contrasts between the rolling hills of the Palouse region and thick forests of pine, fir, and cedar. The northern part of the county boasted the largest stand of white pine in the nation, attracting the Potlatch Lumber Company.

Home to the University of Idaho and close neighbors with Washington State University, Latah County hosts a surprising array of fine dining spots, wineries, art galleries and performance art venues.

The Lionel Hampton Jazz Festival presents world-class musicians to hundreds of visitors each February and a network of locally supplied chefs has resulted in menus that yield a true taste of the region.

Outdoors, visitors will find a number of opportunities for bicycling, mountain biking, hiking, golf and wildlife viewing.

#### DEMOGRAPHICS

Based on the 2010 census, the population of Latah County was 37,244. According to the census, 21.3% of the population of Latah County is living below poverty level. Within Public Health District 2, Latah County has the highest proportion, 43.7% of residents with a Bachelor's Degree or higher.

> "Latah County is unique, there's something for everyone."

#### **ASSETS**

Latah County has many strengths and assets, which promote healthy lifestyles. The University of Idaho provides great education, athletic options, as well as art and music programs. As a young town with a young population, residents are very active. Trails and bike paths are available for physical activity and community activities.

# Lewis County, ID

### **COUNTY PROFILE**

Home to wide-open acres of fragrant farm fields, friendly faces and small towns full of history, Lewis County is a perfect destination choice for vacationers who enjoy soft adventures and history.

Winchester Lake State Park surrounds a 103-acre lake nestled in a forested area at the foot of the Craig Mountains. The park has a modern campground. Picnicking and hiking are popular summer activities. In the winter, the park offers cross-country skiing, ice skating and ice fishing. There are healthy stands of Ponderosa Pine and Douglas Fir. White-tailed Deer, raccoon, muskrat and the Painted Turtle roam the area.

Off the trails and onto the highway, the Camas Prairie Driving Tour explores the history and sites of the region on a scenic tour traveled by automobile, motorcycle and cycling enthusiasts. Late spring and early summer are especially stunning; the Camas is in full bloom and turns the landscape into a sea of vibrant blue.

### DEMOGRAPHICS

Based on the 2010 census, the population of Lewis County was 3,821. According to the census, 18.2% of the population of Lewis County is below poverty level. Within Health District 2, Lewis County at 478.8 square miles and only 8 persons per square mile is the smallest county.

"A destination for the whole family. Come explore!"

### ASSETS

Lewis County has many strengths and assets, which promote healthy lifestyles. Residents enjoy the feel of small towns with easy access to the outdoors. This small county boasts an array of health services, including clinic and pharmacy, chiropractic, physical therapy, and dental services and Nimiipuu Health.

- St. Mary's Clinics
- Nimiipuu Health Satellite Clinic
- Wolf Education & Resource Center
- Law Enforcement
- Fire/EMS

# Nez Perce County, ID

#### COUNTY PROFILE

Nez Perce County, located in North Central Idaho, is noted for is forests, agricultural production, scenic beauty and unusual concentration of higher education institutions in a rural area.

Dominated by the Snake River, Clearwater River and opening on to the northern gateway to Hells Canyon, this region is a perfectly balanced destination choice for those who enjoy outdoor adventure as much as leisure experiences.

Hells Gate State Park is the gateway to both Idaho's Lewis and Clark country and to Hells Canyon, the deepest river gorge in North America.

Consistently ranked as one of the top ten destinations for outdoor sportsmen by Outdoor Life, and often in the top three, the region is paradise for sportsmen. The waters hold bass and trout but are famous for legendary steelhead, Chinook salmon and massive white sturgeon while the hills are home to deer, bear, bighorn sheep, elk, pheasant, chukar and other game.

Nez Perce County lifestyles are a mixture of outdoor recreational leisure, community events, arts and festivals. It is bordered by national forests, wilderness areas, pristine lakes, whitewater rivers, and rugged canyons. In less than an hour's drive, there is access to fishing, camping, hunting, skiing or sailing.

### DEMOGRAPHICS

Based on the 2010 census, the population of Nez Perce County was 39,265. According to the census, 11.3% of the population of Nez Perce County is living below poverty level. Within Health District 2, Nez Perce County, at 46.3, has the highest number of people per square mile.

"I love living in Nez Perce County. All the big city amenities are near, but a small town feel."

### **ASSETS**

Nez Perce County has many strengths and assets, which promote healthy lifestyles. An abundance of activities, from golf to trails and civic groups, all help build a strong sense of community pride. With an array of health services, including clinics, pharmacies, dentists and St. Joseph Regional Medical Center, residents do not have to travel far for many of their medical needs.

### Asotin County, WA

### COUNTY PROFILE

Asotin County is the fifth-smallest county in Washington by area. It is part of the Palouse, a wide and rolling prairie-like region in the middle Columbia basin.

Asotin County is located at the confluence of the Snake and Clearwater rivers. The river system is home to a thriving aluminum jet boat manufacturing industry and provides the wood processing and other industrial users direct barge transportation to the West Coast.

There are three ports within the immediate area and adequate industrial land for business growth and expansion. The highway grid supports access to Idaho and the southern tier of Washington, as well as the northern tier of Oregon, with connections to north-south and east-west interstates.

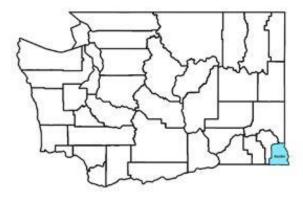

The warm climate, excellent health care facilities, yearround golfing and other recreational opportunities provide exceptional amenities for those looking for an active community for retirement.

The region boasts a safe, rural, educated lifestyle, attracting businesses with its small town hospitality and impressing them with its commitment to area commerce.

#### DEMOGRAPHICS

Based on the 2010 census, the population of Asotin County is 21,623. With 641 square miles, Asotin County only has 34 persons per square mile. According to the census, 15.7% of the population of Asotin County lives below poverty level.

"The gateway to Hells Canyon."

### **ASSETS**

Asotin County has many strengths and assets, which promote healthy lifestyles. An abundance of activities, from golf to trails and civic groups, all help build a strong sense of community pride. With an array of health services, including clinics, pharmacies, dentists and Tri-State Memorial Hospital, residents do not have to travel far for many of their medical needs.
